Node.js

MongoDB

CAREER OBJECTIVE

Military Veteran with experience and a proven knowledge of application development, database design, and web design. Aiming to leverage my skills to successfully fill the Software Engineer role at your company.

EXPERIENCE

SOFTWARE ENGINEER

Resilient Coders, Boston, MA / Jun 2020 - Present

- Design, build, or maintain web sites, using authoring or scripting languages, content creation tools, management tools, and digital media.
- Write, design, or edit web page content, or direct others producing content.
- Supervise and assign work to programmers, designers, technologists, technicians, or other engineering or scientific personnel.
- Confer with management or development teams to prioritize needs, resolve conflicts, develop content criteria, or choose solutions.
- Evaluate code to ensure that it is valid, is properly structured, meets industry standards and is compatible with browsers, devices, or operating systems.
- Maintain understanding of current web technologies or programming practices through continuing education, reading, or participation in professional conferences, workshops, or groups.
- Analyze user needs to determine technical requirements.
- Develop databases that support web applications and web sites.
- Write supporting code for web applications or web sites.
- Modify existing software to correct errors, to adapt it to new hardware, or to upgrade interfaces and improve performance.

COMPUTER SYSTEMS SPECIALIST

United States Marine Corps, MA / Jun 2010 - Jan 2016

- Maintain and administer computer networks and related computing environments including computer hardware, systems software, applications software, and all configurations.
- Perform data backups and disaster recovery operations.
- Diagnose, troubleshoot, and resolve hardware, software, or other network and system problems, and replace defective components when necessary.
- Monitor network performance to determine whether adjustments need to be made, and to determine where changes will need to be made in the future.
- Plan, coordinate and implement security measures to safeguard information in computer files against accidental or unauthorized damage, modification or disclosure.
